

Revisión KDS **MXP** CONFIGURACIONES

NOTA

Se debe tener instalado tanto en el servidor como en las Pantallas el agente del Devops para poder realizar los despliegues.

Despliegue DevOps

`aspnetcore-runtime-6.0.21-win-x64.exe`

`dotnet-runtime-6.0.21-win-x64.exe`

Despliegue DevOps

Base de Datos Sql Server

KDS2.bak

Despliegue DevOps

En la carpeta C:\KDS2

Despliegue DevOps - Pantallas

El acceso directo se despliega en cada Pantalla.

Pantallas KDS - Estándar

Son 3 pantallas, las cuales las IP debe culminar de la siguiente manera:

PANTALLA1 :
X.X.X.58

PANTALLA2:
X.X.X.59

PANTALLA3
SANDUCHES:
X.X.X.60

Impresoras KDS - Estándar

Son 2 impresoras en red, las cuales las IP debe culminar de la siguiente manera:

linea :
X.X.X.67

lineadomi:
X.X.X.66

Despliegue DevOps - Configuraciones Pantalla KDS

En js\app.js e indicar en `const URL` la dirección del servidor. Mantener el puerto o reemplazar según lo configurado en el puerto de escucha del servicio.

```
let config = ''  
let qtyColumn = 4  
let sizeColumn = '260px'  
let lastResponse = ''  
let screenHeight  
let headerHeight = 0  
let footerHeight = 0  
let screenName = '---'  
let splitScreen = false  
let hasSplitScreen = false  
let alignAmount = false  
let sourceBox = ''  
let identifier = ''  
let hasPagination = false  
let showNumerator  
let showPagination  
let shortcuts = []  
let power = true  
let orderElement  
let orders  
let visualOrders = []  
let currentPage = 1;  
let totalPages  
let idxOrders = 1  
let inThisPage = []  
let average = '00:00'  
let cardColorByTime = []  
let products = ''  
let partedTicket  
  
const URL = 'http://10.242.14.22:8100/'  
const URL_CONFIG = URL + 'config'
```
